WORK HISTORY

February 2018 - Current

Front End Developer *Walgreens Pharmacy*, Nashville, TN

Worked closely with the product and engineering teams to deliver responsive, user-centric applications and backend services using a modern JavaScript stack.

- Developed responsive web applications using HTML, CSS, and JavaScript frameworks.
- Built and maintained interactive dashboards and CRUD-heavy web modules using **React.js**, Bootstrap, and Styled Components.
- Created **reusable, performance-optimized React components** using functional programming patterns and **React Hooks** (`useState`, `useEffect`, `useContext`).
- Implemented state management using Redux and Context API to handle complex application state across multiple components.
- Applied **React Router** for dynamic routing and seamless navigation between views in single-page applications (**SPAs**).
- Followed **Component-driven development** principles and integrated with Storybook to document UI components.
- Ensured **cross-browser compatibility and responsiveness** using Flexbox, Grid and mobile-first CSS practices.
- Conducted unit testing of React components using **Jest** and **React Testing Library**, improving front-end reliability.
- Wrote modular, reusable frontend components and introduced internal UI component libraries to improve development speed.
- Built and maintained **40+ responsive websites, upgrading and modernizing 150+ customers-facing applications** to meet evolving web standards.
- Worked with **WebPack and frontend build pipelines** to support production-ready deployments.
- Participated in **weekly code reviews**, enforcing Git best practices and clean component architecture.
- Mentored junior developers through **code reviews, technical guidance, and knowledge sharing**.
- Collaborated with UX/UI designers to implement visually appealing and user-centric designs on e-commerce platforms.

- Optimized website performance through code reviews and best practices in front-end development, increasing load speed.
